UNIGATE

**Decentralized Merchant
and DEX Multichain**

The Market

WORLDWIDE POPULATION

- 300 million crypto wallets
- 1.7 billion unbanked people without KYC

DEX VOLUME IN 2021

- Estimated users: **18 million**
- Estimated volume: **320 billion**

MERCHANT MARKET

- 300,000 people enter the crypto market every day
- 1.7 billion people don't have a bank account
- The number of merchants that start accepting cryptocurrency transactions is growing every year by 70%
- USD 100 billion per year potential market

Problems At Hand

- Decentralized cryptocurrency payment facilitators are not Multichain compatible.

- No plug-and-play crypto payment facilitators exist.

- There is a lack of tools to use the DEX platform in the real economy.

- Many companies do not have enough knowledge to integrate crypto payments within their website.

- There is a demand from the crypto community to be anonymous and independent in the custody of crypto-assets and their transaction.

- Most of the current restrictions in a majority of countries and potential geopolitical restrictions bring with them the fear that crypto-assets could be frozen by centralized platforms.

- Hack-and-steal attempts on centralized platforms

Solution: Trustworthy Technology

UNIGATE allows instant **cryptocurrency** token swapping without registration and lets **merchants** accept any type of **payment** through different decentralized **blockchains**. Purely DeFi, no hybrid.

Road Map

UNIGATE

Q3 & Q4 2021

☑ Project Setting and Launch
☑ Partnership Agreement with Cherry Labs
☑ Product Development
☑ Legal Analysis

Q1 2022

☑ Seed Fundraising
☑ White Paper
☐→ Private Sale (till 15 June 2022)
☑ Team & Member Release

Q2 2022

☑ Roadmap Update
- Merchant
- Decentralize Invoicing
- Mass Payment
- Pool
- Staking & Membership TIER
- Public Sale (15 June - 25 June)
- Product Development
- Farming
- WooCommerce Plugin

Q3 2022

- DEX Integration
- 10 New Token Integration
- Payment Hedging
- Borrowing & Lending

Q4 2022

- DEX Card Payment integration
- P2P dashboard

Utility of UNIGATE Tokens

At the core of all decentralized applications and services of the **UNIGATE** platform lies the **UNIGATE Token** (UGT). A utility token that is used to pay validators when they process inbound and outbound bridging or routing is also used for **farming, staking**, and many other functions further described in this documentation.

The **UNIGATE token** will be sold in seed, private, and public sales (described in the Distribution and Vesting) for varying prices. The proceeds of **the UNIGATE Token** sale were used to fund the development and marketing of the protocol and its platform for the years to come.

UNIGATE

Tokenomics

STATISTICS

- Total supply: 100,000,000 UGT
- Release price: 0.6 USD
- Tokens sold: 13,000,000 UGT

Distribution & Vesting

Name	Amount (UGT)	Percentage	Vesting
Seed Investors	2,400,000	2%	18 months, linear monthly
Private Sale	9,400,000	10%	12 months, 10% on TGE, then linear monthly
Public Sale	1,000,000	1%	4 months, 20% on TGE, then linear monthly

Core Committee

Mac Ocampo
CMO

Mac is a crypto-versed CMO with 22+ years of experience, leading marketing & growth at CxO positions for 5+ in Crypto, DeFi, NFT, and Fintech projects. He is an ex-SM Director in Leo Burnett and an ex-MD at a digital agency. He initiates performance marketing and data analysis to bolster customer acquisition.

Pawel Sobkov
CEO
UNIGATE

Pawel has co-founded Norion, Pinewood Estonia & Pinewood Holdings Ltd (BitBay Operator) and has led as an MD and VP at various investment houses, stock exchanges, and software firms. He holds a Ph.D., MBA, and an MA and has been in membership & presidency roles across different supervisory boards. He has served as an academic lecturer at various universities. As a CEO of the BitBay Operator, the company became the biggest crypto-fiat platform in CEE in 2019/2020 (3.8 billion USD merchant transactions processed).

Claudia Meriano
CFO

Claudia has 22 years of professional activities involving finance and people management, compliance and safety regulations adherence, and risk mitigation. She was a Safety Director for the Italian market for eight years. She has 5+ years of experience in Crypto Exchange financial management and accounting.

Core Committee – Technology

Buer
CTO, Cherry Labs

Buer is an experienced software engineer. With a master's of science in neuroscience, he found his calling in software development and blockchain. He joined the cryptocurrency field in 2011. He became a core developer of DASH, where he contributed to the first implementation of the master node, the original on-chain governance system. He contributed to PIVX, a privacy cryptocurrency renowned for zPIV, which is a privacy protocol based on zero-knowledge proofs and bulletproofs. Buer researched cryptography and advanced the various iterations of zPIV. He co-founded Cherry in October 2020 alongside Herman and is currently the CTO of Cherry Network and its incubator, Cherry Labs.

Herman Jacobs
Business Strategy
Cherry Labs

Herman has contributed to open-source software, including the Tor Project of 2007. He was involved in creating Feathercoin, one of the first alternative cryptocurrencies (2013), and notable blockchain projects, such as DASH and PIVX. In 2019, he co-founded Cherry Network and currently leads Cherry Labs, incubating the Cherry Ecosystem.

Core Team – Legal & Compliance

Baiba Broka
Legal Officer
Protocol33 Hub

Baiba is Latvia's former Minister of Justice and was president of the Latvian Biathlon Federation. She served on the board of Freeport of Riga, an air navigation service provider, and as an executive member of the Latvian Olympic Committee. She is a lecturer at the University of Latvia and a visiting faculty for universities in Brazil, the US, and Estonia.

Solandia Jurdi
Compliance Officer
Protocol33 Hub

Solandia has six years of experience specializing in Regulatory Compliance, AML, and CFT, alongside legal and corporate governance. She is based on Virtual Asset businesses and exchanges, helping FinTechs develop compliance, regulatory, and AML frameworks for today's market and within multiple jurisdictions.

UNIGATE

Advisory

Alessio Vinassa
Business Development Advisory
Founder - Protocol33

Alessio has worked in Business Acceleration, Development & Innovation and has been involved in the FinTech and Blockchain sector since 2013. He has been a VC investor in 15+ blockchain projects and is an expert in white label solutions, crypto payment systems and partnership management, and project growth strategy.

Core Team – Managers

Amit Sharma
Project Manager
UNIGATE

Amit has six years of experience in FinTech, majorly in financial inclusion and building transactional platforms for merchants, last-mile, and the underbanked population. In addition, he has had roles in transformation, operations, IT, partnerships, onboarding, product ownership, and go-to-market.

UNIGATE

Business Team

Ivan Begumisa
Sales

Ivan joins the blockchain & crypto space after four years at an Equities and Fixed Income securities stockbroker in Uganda with experience in sales and relationship management for both individual & institutional investor clients as well as project coordination for IPO's, private placements and ESG corporate governance projects across East Africa.
